

Superintendent's message:

Windham School District counselors support academic success behind bars

We proudly recognize the Windham School District Counseling Staff this February.

Counseling efforts are critical to the success of students on each campus. Windham counselors have tremendous impact in helping students achieve school success and plan for productive lives after their release from prison. Last school year WSD counselors helped support nearly 79,000 students in the district, maximizing educational opportunities, and helping develop skills for future success.

Training Day: WSD's South Texas Counselors join diagnosticians and testers in San Antonio for staff development training on new testing techniques.

Counselors in correctional education guide some of the most challenging students in Texas, all the while working within a difficult high security environment. We thank these employees for helping place offenders in appropriate education programs, working to help teachers resolve student behavioral problems, coordinating unit testing programs, and providing group and classroom counseling. WSD counselors are to be commended for their valuable contributions: each day they help change lives for the better!

Thank you, Counselors!
